Been boating abroad?

Invasive species block waterways. Don’t bring them back.

Before you get back on the water:

**CHECK**

Check boats, equipment and clothing.

**CLEAN**

Clean everything thoroughly and anti-foul boats annually. Put fouling in the bin, not back in the water.

**DRY**

Dry. Drain water from every part of your boat or trailer before leaving the site. Dry clothing and equipment as long as possible before using elsewhere.
