# NON-NATIVE SPECIES: RESPONDING TO THE CHALLENGES

This workshop aims to inform all sectors about the challenges and practicalities of dealing with non-native species and to discuss measures that can be taken to reduce against the costs that these species have on both our financial and environmental assets.

A focus of the day will be the recent changes to Schedule 9 of the Wildlife and Countryside Act 1981 in which a significant number of non-native species have been added, in addition to Japanese Knotweed and Giant Hogweed.

Members of the construction, business and development industries along with those from the conservation and land management sector are invited to come along to this highly informative and interactive workshop that gives all who attend the opportunity to question speakers and network with leading experts and practitioners within this field.

The day provides a valuable opportunity to :

- **understand** how to overcome the practicalities and challenges of non-native species
- **learn** what the Schedule 9 amendments mean
- **network and share experiences** across different fields of invasive species ecology and management

## Booking form

Non-Native Species: Responding to the Challenges, Birmingham Botanical Gardens, 24 November 2010

Contact name: \_\_\_\_\_

Email address: \_\_\_\_\_

*Confirmation details will be sent by email.*
